## AI-based Parsing and Crow-Sourcing Comprehensive Street Address Management Solutions

- Standards Enforcement
- Data-Driven Architecture
- Parsing With Machine Learning
- Customize Address Parsing Engine
- Address Database Quality Control
- Address Parsing Web Services
- Address Crowd-Sourcing Platform
  - On-Line Address Editing
  - Url Sharing
  - Transaction Management
  - Vector Tile Caching

The screenshot shows the EMAP - Arizona web application. The main map area displays a residential street layout with a search bar at the top. A sidebar on the left contains various filters and controls, including 'Address Filter', 'Boundary Category', 'Authority', 'Public Safety Answering', 'PSAP', 'ESZ', 'Street', and 'Data Retrieval'. A 'Details' window is open over the map, showing a table of transactions for a specific address.

ID	TIME	USER	TYPE	A/S
11871	2019-02-17 15:38	logan	Update	A
New Value				
Addr_Rubicon	3210			
City	02			
County	00810003			
State	03			

Below the details window, there is a table with columns: Legend\_Flag, Site\_NGID, DiscrApId, DateUpdate, Effective, Expire, Country. The table contains several rows of data, including entries like '41184CA-F807...', '7E2020D9-8A09...', '3996894-975D-4...', '413383BA-58CB...', and '20C3E9F9-5855-4...'.
